## **INTRODUCTION**

### **COMMUNITY CONTINGENCY PLAN**

Eastern Charlotte Waterway's developed this Community Contingency Plan under the direction of The Community Action Partnership Program (CAPP).

This Plan was developed not only for oil spill response, but also for all environmental or emergency responses.

In case of any such emergencies, please contact The Canadian Coast Guard Operation Centre at **1-800-565-1633**. They will receive your calls 24 hours a day and notify the appropriate Government agency.

- **(Gasoline and chemical spills should also be reported to your local fire department.)**

Environmental Emergencies – **1-800-565-1633**

Eastern Charlotte Waterways – **(506) 755-6001**  
**(506) 755-2047**  
Fax # **(506) 755-6187**

CANUTEC- **(613) 996-6666**

## **PURPOSE**

\*To provide basic direction to the community in the event of an oil spill or environmental emergency.

\*Identifies community resources available to the community and to incoming responders.

\*Provides a constant approach to contingency planning at the community level.

\*To assist in the definition of interface, roles, and responsibilities between federal, provincial, and municipal officials.

\*The components of this plan are contained in the table of contents.

## **NOTIFICATION**

### **ENVIRONMENTAL EMERGENCY NUMBER**

**IN THE EVENT OF AN OIL SPILL OR AN ENVIRONMENTAL EMERGENCY,  
PLEASE CALL – 1-800-565-1633**

Your contact will be the [Canadian Coast Guard Operations Centre](#), who will notify the appropriate government agencies.

When reporting an incident to the operations centre, callers should give their name (optional), telephone number, and time the spill or environmental emergency was sighted.

**HERE ARE A FEW IMPORTANT THINGS YOU SHOULD TRY TO NOTE  
WHEN YOU REPORT A SPILL OR AN EMERGENCY:**

1. What is spilled, how much, and where it is located?
2. Is the spill on land, in the water, and is it moving?
3. Do you know the source of the spill?
4. Is the spill an immediate threat to public safety?
5. What type of environmental emergency is it?
6. What the extent of the damage is.

**(GASOLINE SPILLS SHOULD ALSO BE REPORTED TO THE LOCAL FIRE  
DEPARTMENT)**

**EVEN IF YOU DO NOT KNOW THE ANSWERS TO ALL OF THE QUESTIONS,  
DO NOT WAIT. CALL 1-800-565-1633 SO A RESPONSE CAN BEGIN.**

## **COMMUNITIES ROLE**

### **GENERAL**

The community will identify local resources and sensitivity information.

The community will also maintain and update the community-based response resource guide with the assistance of Canadian Coast Guard and various organizations.

The community will work with the responding agencies to determine the definition of interface, roles and responsibilities.

## **LEVELS OF RESPONSIBILITIES**

### **A) POLLUTER (RESPONSIBLE PARTY)**

The polluter (**responsible party**) has the first responsibility for initiating effective action to counteract an environmental emergency. The polluter also has financial responsibility for damage and cleanup costs incurred as a result of spill or environmental emergency.

The responsibility is subject to any liability arrangements or limitations provided by statute or court decisions, or by international conventions in force and ratified by Canada at the time of the incident. If the polluter chooses not to initiate cleanup actions or if the situation is of such magnitude that the polluter is unable to respond adequately, or if the polluter's response is inappropriate, ineffective, or unsafe, then the Coast Guard will appoint an on-scene commander and assume command and control of the situation.

### **B) CANADIAN COAST GUARD**

THE CANADIAN COAST GUARD HAS THE LEAD ROLE IN RESPONDING TO THOSE MARINE EMERGENCIES WHEN:

- 1.) Department of Fisheries & Oceans, by legislation, regulation, interagency agreement and precedent, has been authorized.
- 2.) Assignment of authority has not been established but the Federal Government instructs the Department of Fisheries & Oceans, because of its authorities, marine expertise and resources, to lead the response.

The Canadian Coast Guard is responsible to investigate and act as lead agency for spills originating from vessels within "waters of Canadian interest", under its jurisdiction. In these cases, the CCG is responsible to ensure that the vessel owner complies with the Canada Shipping Act (CSA) and accepts responsibility for cleanup. The Canadian Coast Guard is also responsible for mystery spills.

### **C) DEPARTMENT OF FISHERIES & OCEANS**

The Department of Fisheries & Oceans is responsible for managing and providing information and advice regarding fisheries resource and their habitats, as well as scientific advice in relation to fish. Also, they have a major responsibility under the fish inspection act to ensure the contaminated product does not enter the market and that the public health is protected.

### **D) ENVIRONMENT CANADA**

Environment Canada, Environmental Protection Branch (EPB), leads the investigation of spills originating from Federal facilities and Federal vessels. EPB also has shared responsibilities with Fisheries & Oceans for spills impacting waters frequented by fish, under the Canadian Fisheries Act and the Canadian Environmental Protection Act.

EPB is responsible for ensuring that regional mechanisms are in place for timely and effective environmental emergency response efforts. To this end, the Regional Environmental Emergencies Team (REET) has been organized to provide consolidated, coordinated and comprehensive environmental information and advice concerning environmental impacts, resource sensitivities, environmental forecasting, contingency planning, cleanup techniques and priorities, and a host of other matters which arise while planning and responding to emergency events which affect or risk environmental quality.

While REET is chaired by Environment Canada, EPB, it includes a large number of Federal and Provincial agencies, which have expertise, information and responsibilities/authority relevant to environmental emergencies and environmental protection. Private industry and industry associations also participate in REET as they have significant interest in emergency response. Coastal communities will link into the REET process through the regional Community Action Partnership Program (CAPP) coordinator.

**E) OFFICE OF CRITICAL INFRASTRUCTURE, PROTECTION & EMERGENCY PREPAREDNESS (OCIPEP)**

This agency has the mandate to advance civil preparedness in Canada for emergencies of all types... by facilitating and coordinating among Federal institutions and in cooperation with Provincial Governments, Foreign Governments, and International Organizations, the development and implementation of civil emergency plans.

**F) NATURAL RESOURCE CANADA (NRCAN)**

In the maritime region, EMR maintains the Atlantic Geoscience Centre to provide scientific advice in the area of coastal geomorphology, to determine the impact of cleanup methods on beaches and to conduct research aimed at better understanding beach process throughout Atlantic Canada. Atlantic Geoscience Centre can also provide technical advice on chemical and toxic substances and their interaction with coastal and marine sediment, and shoreline video coverage.

**G) CANADA-NOVA SCOTIA OFFSHORE PETROLEUM BOARD**

Under the Canada-Nova Scotia accord implementation act, CNSOPB is responsible for environmental as well as health and safety matters associated with oil and gas activity. CNSOPB is the lead agency for response to spills associated with exploration and production activity in their area.

**H) PROVINCIAL EMERGENCY MEASURES ORGANIZATIONS**  
**(NBEMO, NSEMO, PEIEMO)**

Provincial emergency measures organizations are lead agencies for incidents where public safety is the prime concern and can provide assistance to other lead agencies as required (e.g. evacuation, search and rescue, surveillance).

**I) TRANSPORT CANADA – TRANSPORT OF DANGEROUS GOODS**

Transport of Dangerous Goods inspectors are responsible for the enforcement of the transportation of dangerous goods regulations as they apply to land, water and air transport. TDG maintains a 24-hour national response centre called

**CANUTEC**, and provide investigations during transport emergencies involving chemicals and other dangerous goods.

CANUTEC is the Canadian Transport Emergency Centre. It is located in Ottawa and is operated by the Transport of Dangerous Goods directorate of Transport Canada. In an emergency,

**CANUTEC may be called collect at (613) 996-6666(24 hrs.)**

CANUTEC provides a national bilingual advisory service and is staffed by professional chemists. Experienced and trained in interpreting technical information and providing emergency response advice when an emergency call is received by CANUTEC. The emergency response advisor obtains relevant information about the emergency and recommends the appropriate response actions for the protection of the public and for the stabilization and containment of the dangerous goods involved.

#### **J) ROYAL CANADIAN MOUNTED POLICE (RCMP)**

The RCMP responsibilities at the accident site are for traffic and crowd control, dealing with casualties, explosives disposal, bomb threats, evacuations and investigation of criminal matters. By virtue of being first on the scene, the RCMP may also be obligated to handle initial spill containment.

#### **K) CANADIAN HERITAGE, PARKS CANADA**

Parks Canada operates and maintains a significant number of national parks and heritage sites in the Atlantic Region. All the national parks have contingency plans to respond to environmental emergencies under their jurisdiction. Emergency section of EC liaise closely with Parks Canada staff during large incidents to share response resources and minimize the environmental impacts.

#### **L) PROVINCIAL DEPARTMENT OF ENVIRONMENT** **(NS, NB, PEI)**

The Provincial Department of Environment acts as lead agency for spills that fall under Provincial jurisdiction and are responsible for the designation of disposal sites and disposal procedures. In addition, are a resource agency for human resources, surveillance, cleanup and environmental advice and where appropriate, soliciting input from other provincial government agencies such as fisheries, health, mines and energy. The Provincial Environment Departments investigate spills originating from land-based source or sewers or spills affecting potable water supplies.

## **RESPONSE ORGANIZATION ROLES**

### **A) GENERAL**

The response organizations have been created to ensure that a capability exists to deal with oil spills in the Canadian Marine Environment. Every bulk oil tanker over 150 gross tonnes, every dry cargo vessel over 400 gross tonnes, and all designated Oil Handling Facilities (OHF's) are required by the Canadian Shipping Act to have an arrangement with a certified response organization. The entire above is referred to as "clients" by the response organization.

The response organization may respond to a client's request for assistance in the event their property is involved in an oil spill. The response organization may provide operational management for the client who is the "responsible party" in the event of a spill.

### **OPERATION MANAGEMENT INCLUDES:**

**LOGISTICS**: the procurement of resources to support the operation.

**PLANNING**: the identification of sensitivities, shoreline impact assessment, prioritization of activities, waste disposal coordination, application of cleanup techniques, health and safety plan development, and documentation.

**OPERATIONS**: the application of the procured resources.

**FINANCE**: payment of costs incurred by the response organization and invoicing for services rendered.

### **THESE DEFINITIONS ARE RESPONSE ORGANIZATION DOCTRINE.**

The response organization is not responsible for the effects of an oil spill. This remains with the polluter. Command and control of all activities remains with the polluter. In the event the polluter does not accept this role, the Canadian Coast Guard assumes "command and control" of the incident and the response organization may be hired by the Canadian Coast Guard.

The response organization will also plan for the protection of the identified sensitivities prior to oil spills occurring in its geographic area of response, and will work with communities to this end.

**Geographic Boundaries**

**A) Narrative description of area covered by plan:**

Deer Island, Bay of Fundy, West Isles, Quoddy Narrows

**B) Aligning Boundaries to the Community:**

Deer Island, Lubec, ME, Grand Manan

## **Communication Systems**

### **A) Landline Communication**

**Cellular Coverage:** NB Tel Mobility (506) 755-7626  
CANTEL Communications (506) 466-3700

**Landline Coverage:** (506) 755-8500  
Contact Person: Wally Graham (H)(506) 755-2581  
Contact Person: Terry McCullough (W)(506) 755-8500

### **B) 2-Way Radio Communication**

**UHF** – Available in the community

Arthur Arbeau – (506) 747-2467 also available at work (506) 747-2454

**AMATEUR RADIO OPERATORS** – Roger Thompson – (506) 456-3609  
Richard Smith – (506) 755-2960  
Arthur Arbeau – (506) 747-2467

### **Environmentally Significant Areas**

Areas of environmental significance around Campobello Island are each diverse and unique in their recognized qualities.

This is a list of the Environmentally Significant areas in the [Campobello area](#).

- 1) **Upper Duck Pond Bog** – This wetland area encompasses tidal flats, estuary, marsh, bog and mixed woods, with a well-developed saltmarsh along the fringe.
- 2) **Campobello Island** – The Island is a major nesting, feeding, and staging location for migratory birds.
- 3) **Lower Duck Pond Bog** – A small ombrotrophic bog.
- 4) **Liberty Point** – An important nesting, feeding and staging location for migratory birds, and provides aquatic feeding grounds for fish and marine birds.
- 5) **Basket Heath** – Rare plant as listed by Hinds (1983 & 1986) grows in the southwestern part of this bog.
- 6) **Friar's Head** – Site of rare plants as listed by Hinds (1983 & 1986).
- 7) **Abrahams Plain Bog** – Small ombrotrophic bog with an open dome; Sphagnum peat (100%) forms the entire deposit.
- 8) **Head Harbour Passage/Quoddy River Region** – This turbulent area of high marine productivity attracts a very large concentration of seabirds: Black-crowned Night Heron found here.

## **1.0** **Accommodations**

### **1.1 Hotels & Motels**

#### **Campobello Whale Watch Company Motel**

Open all year  
935 Route 774  
(506) 752-1912  
Owner: Stefan Matthews

#### **Friars Bay Motor Lodge and Restaurant**

Open all year  
802 Route 774  
E5C 1A6  
Welshpool, Campobello  
(506) 752-2056  
Owner: Harriet Parker

#### **Island Chalet**

Open all year  
158 Narrows Road  
Campobello, NB  
(506) 752-2971  
Units accommodate 4+ persons per  
unit  
Owners: Rob & Diane Lahey

#### **Lupine Lodge**

610 Route 774  
Welshpool, Campobello  
(506) 752-2555  
Owners:  
11 Rooms

#### **Waters Edge Villa's**

49 Hutchins Road  
Campobello, NB  
Owner: Stefan Matthews  
(506) 752-2359  
3 units accommodating 6+ people  
per unit

### **1.2 Bed & Breakfast**

#### **Owen House B & B**

Open May 1<sup>st</sup> – November  
11 Welshpool  
Unable to take boarders through  
winter season. Nine guestrooms.  
(506) 752-2977

### **1.3 Campgrounds**

#### **Herring Cove Provincial Park**

136 Herring Cove Road  
Herring Cove, Campobello  
(506) 752-7010  
Contact: Sherry Coates  
76 Units available. 40 Electrical and  
36 non-electrical

**Vessels of Opportunity**

This area is usually filled with names of boat owners that fill in information sheets prior to any spill. As we all know everyone turns out in an incident and we can get the information at that time.

**32.0**  
**Volunteers**

Again, we really like to have CAPP registered volunteers on file prior to an event, but will accept people at the time of a spill.
